Faster, Easier, More Accurate Payroll with EPI-USE People Pay

people•pay

"We've seen an 80% reduction in our error rate in payroll which is a huge, huge achievement". Clare Martin, HR Director, Jardine Motors.

We help HR and Payroll Managers to dramatically cut their payroll processing time and reduce their current Payroll processing 'window' to avoid common problems such as delayed pay for new hires, or overtime, or manual adjustments required during payroll processing.

With EPI-USE People Pay, your payroll team can fully focus on paying people and not have to think about the technology. It's easy to use and the subscription price includes support for day-to-day issues, legal and compliance updates and your year-end processing.

Pricing starts from £2.20 per employee per month and the setup time can be as quick as only 12 weeks.

HR and Payroll Processes Combined

EPI-USE People Central automates and streamlines many of your people-based tasks. For example, employees can book their own leave on computers or mobiles and can check how many days they have left. Managers get automatic alerts to give approval and HR doesn't need to get involved.

EPI-USE Pay People Quicker

- EPI-USE People Pay automates the approval process so you don't have to chase corrections and approvals or keep a track of them on paper or by email. This functionality alone hugely reduces any chance of delays.
- Slash your payroll processing time to a few days. Before coming to us, many of our Payroll customers could only enter data for half of the month as their Payroll took so long to process.

EPI-USE Pay People More Accurately

- EPI-USE People Pay frees you to move away from batch-style processing to a continuous payroll process with real-time monitoring of exceptions.
- Say goodbye to time-sucking admin tasks such as going through error logs, spools, reports, diverse check tools and using Excel to find payroll-related errors.

EPI-USE Pay People More Easily

- Do you often have to get your calculator out or use additional spreadsheets to fill the gaps in your current Payroll system or service? EPI-USE People

Pay automatically handles changes such as mid-month starters/leavers and back dated changes automatically (pro-ration and retro calculation are standard). So, you can keep your calculator in your drawer!

- Because EPI-USE People Pay dramatically cuts admin time and automates many processes, you can expand significantly and only need half the ef fort other payroll systems typically require.

EPI-USE People Pay is designed to give the functionality which most SMEs need, but we do have the in-house skill to adapt the system to meet any additional challenge or request you may have.
