

# FastTrack ES4

## EPI-USE Plus guiding you through the End-to-End S/4HANA Migration Journey

### S/4HANA Proof of Value

Leveraging our **EPI-USE Plus** Methodology, which works with cloud based or on-premise S/4HANA environments, our team of Experienced Management Consultants and SAP Experts help you build or verify your S/4HANA business case.

### Tailored Financial Solutions

Prepare for S/4HANA implementation by migrating to SAP's latest innovations and mandatory functionality to minimize project work.

### Managed Services

**EPI-USE Plus** provides you with experienced Consulting resources with deep industry experience and that speak your language and understands SAP's industry solutions and best practices.

### S/4HANA Assessment & Planning

The **EPI-USE Plus** team will provide a detailed understanding of a S/4HANA implementation and build a detailed business case for your Organization.

### S/4HANA Migration Toolkit

A comprehensive solution for S/4HANA lifecycle management backed by a compendium of best practices, tools and accelerators to speed up your S/4HANA migration journey.

### S/4HANA Implementation Services

Address technical and functional requirements to prepare for your Organization's S/4HANA implementation.

## A Unique Migration Tool

**EPI-USE Plus** has built many capabilities into the FastTrack ES4 toolkit to enable rapid transition in the SAP S/4HANA migration process.

#### Migration analysis

Assessment of custom code integrating Simplification Database, UPL and custom code management

#### Interface analysis

Detailed assessment of interface errors and warning when migrating to S/4HANA

#### Unicode analysis

Unicode related errors and warnings in custom code

#### Performance analysis

Performance related errors and warnings in custom code

#### DB analysis

Analysis of DB-specific coding issues when moving to S/4HANA

#### Data model changes

Impact analysis of data model changes

#### Landscape comparison

Identification and adjustment of objects out of sync in different environments

#### Automation analysis

Identification and automated adjustment of some custom code elements

## EPI-USE Plus Migration Methodology

### Assess

- Overview session
- S/4HANA capabilities session
- Value discovery workshop
- Proof of Value (optional)
- Infrastructure assessment
- Business case definition
- Overall readiness assessment
- Project charter

### Prepare

- Define scope
- Define project plan
- Prepare baseline infrastructure
- Conduct migration pre-checks (FastTrack ES4 toolkit)
- Assess migration impact
- Prepare target infrastructure
- Obsolete code decommissioning

### Realize

- Upgrade & migration services (SUM with DMO)
- Code adjustment & remediation
- Guided configuration
- New mandatory functionality changes
- Testing
- User training
- Cutover planning
- User role adjustments

### Deploy

- Post migration checks
- Perform cutover
- Establish support help desk
- Provide hyper care
- Enable end users
- Change management
- Explore S-Innovations
- Explore Fiori apps
- Explore S/4H Analytics

### Optimize

- Plan process optimizations
- Plan performance optimizations
- Fiori adoption
- S-Innovations rollout
- S/4H Analytics adoption

# FastTrack ES4

EPI-USE Plus guiding you through the End-to-End S/4HANA Migration Journey

## Proof of Value (PoV)

### S/4HANA Workshop

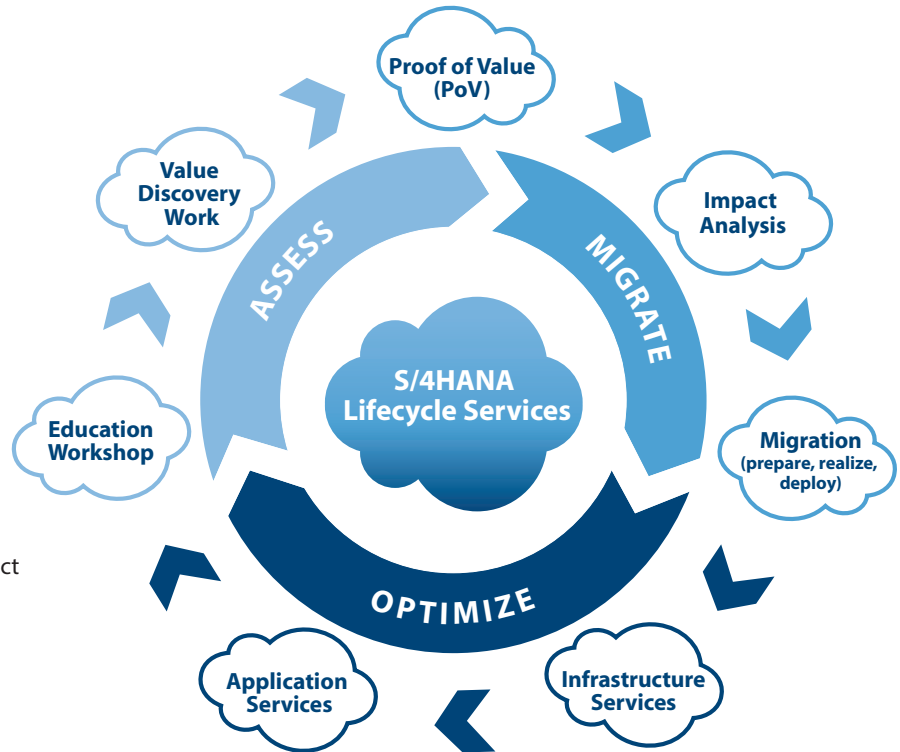

- 1-2 day workshop to define your key business and IT proofing points and use case scenario(s)

### PoV Execution and Testing

- Estimated duration of PoV: 5-10 weeks dependent on PoV goals and scope
- Conducted in a client's hosted environment or can be provided by EPI-USE Plus S/4HANA Global Team using client data

### Validation and Acceptance

- PoV ready to accelerate S/4HANA migration project
- Defined project metrics and ROI
- Knowledge transfer throughout the process

## Options for S/4HANA Migration Programs

EPI-USE Plus has developed various commercial models to help with the decision to migrate with a Public Sector and Higher Education focus.

### Time and Materials

- Client and consultant agree on resources, effort and rates and monitor progress and spend.
- Client controls spend and owns the risk associated with benefit realization.

### Fixed Fee

- Client and consultant agree on a fixed fee amount for fixed scope, timeline and deliverables.
- The spend is controlled (as long as scope, timeline and deliverables do not change).
- Consultant owns risk related to project spend overages, but not benefit realization.

### Business Outcome

- Business Case defined with shared ownership in defining targets and critical success factors.
- Fees tied to delivery of successful business outcomes. Joint commitment to quantifiable results.
- Complete integrated solution delivery with the EPI-USE Plus S/4HANA Migration Methodology.
